## Mobile Home Tie Down Verification

Mobile Homes must be placed on a site in a stable manner and be free from hazards such as sliding and wind damage. The CHA will not subsidize a mobile home that is not tied down.

Mobile homes must be securely anchored by a tie down device, which distributes and transfers the loads imposed by the unit to the appropriate ground anchors, so to resist wind overturning and sliding.

I hereby verify that this mobile home has the appropriate tie down system required.
